

Academic Curriculum Foundation Stage

Bmps Banga is committed to providing a strong foundation for our students, starting from the early years. Our **Foundation Stage Junior Wing**, which includes kindergarten classes, is designed to provide a safe, nurturing, and stimulating environment for our young learners to develop their skills, knowledge, and dispositions.

As per the National Education Policy (NEP), our kindergarten program focuses on holistic development, which includes cognitive, socio-emotional, physical, and creative domains. Here are some of the key features of our Foundational Stage Junior Wing:

Play-based Learning: Our kindergarten program is centered on play-based learning, which encourages exploration, discovery, and inquiry. We believe that play is an essential part of children's learning and development, and we provide a range of play-based activities that promote creativity, critical thinking, and problem-solving.

Child-Centered Approach: Our kindergarten program is designed to be child-centered, which means that we focus on the needs, interests, and abilities of each child. We encourage children to take ownership of their learning and to express themselves in a variety of ways.

Multilingualism: Our kindergarten program is designed to promote multilingualism, which is a key feature of the NEP. We provide opportunities for children to learn multiple languages, including English, Hindi, and Punjabi, through immersive and experiential learning.

Personalized Attention: Our kindergarten program emphasizes personalized attention, which means that we maintain a low student-teacher ratio and provide individualized support and guidance to each child.

Health and Well-being: Our kindergarten program emphasizes the health and well-being of our students, which is a key aspect of the NEP. We provide a range of activities that promote physical fitness, mental health, and emotional well-being, including yoga, meditation, and mindfulness.

We believe that our kindergarten program provides a strong foundation for our students and prepares them for success in their future academic and personal pursuits.

Academic Curriculum

We take pride in providing a well-rounded education that prepares our students for success in academics and beyond.

Our academic curriculum is designed to meet the rigorous standards set by the Central Board of Secondary Education (CBSE) and provides a strong foundation in all core subjects. Our faculty members are highly qualified and experienced and use a variety of teaching methods to engage and challenge students. Below is a brief overview of our academic curriculum:

Preparatory Stage (Classes III - V) :-

Our primary years curriculum is designed to provide a strong foundation in language, Math, Science, and Value Education. We also incorporate Art, Music, Physical Education, and Technology into our curriculum to provide a well-rounded education. Our primary years curriculum emphasizes the development of critical thinking skills, problem-solving, and collaboration.

Middle Stage (Classes VI - VIII) :-

Our middle school curriculum builds on the foundation laid in the primary years and prepares students for the more challenging high school curriculum. Students continue to study core subjects, including language, Math, Science, Social studies, and Physical education. We also offer a range of electives, including art, music, and computer science, to give students the opportunity to explore their interests and passions.

Secondary Stage (Classes IX - X) :-

Our high school curriculum prepares students for the CBSE board examinations in Classes X and XII. Students continue to study core subjects and have the option to select elective courses that align with their interests and career aspirations. We also offer specialized coaching for competitive examinations such as JEE, NEET, and NDA, to prepare our students for success in these highly competitive fields. In addition to our academic curriculum, we also focus on the development of life skills and character traits such as perseverance, integrity, and empathy, to ensure our students are well-rounded individuals who can contribute positively to society.

We look forward to the opportunity to partner with you in providing your child with an exceptional education.

Curriculum Areas at Senior Secondary Stage :-

For the purpose of fostering competencies in learners, the curriculum encompasses seven major learning areas, which are: Languages, Humanities, Mathematics, Sciences, Skill Subjects, General Studies and Health and Physical Education. These areas are broadly divided into electives and compulsory areas as detailed below:-
